Create a React-based Product Store Interface that fetches product details from an online API. Display the products as cards containing the product image, name, and price. Implement a search facility that filters the products dynamically based on the product name entered by the user.

Code:-

```
import axios from "axios";
import { useEffect, useState } from "react";

function App() {
  const [products, setProducts] = useState([]);
  const [search, setSearch] = useState("");

  // Fetch products from API
  useEffect(() => {
    axios
      .get("https://fakestoreapi.com/products")
      .then((response) => {
        setProducts(response.data);
      })
      .catch((error) => {
        console.log("Error fetching products:", error);
      });
  }, []);

  // Filter products based on search
  const filteredProducts = products.filter((product) =>
    product.title.toLowerCase().includes(search.toLowerCase())
  );

  return (
    <div style={styles.container}>
      <h1>Product Store</h1>

      <input
        type="text"
        placeholder="Search products..."
        value={search}
        onChange={(e) => setSearch(e.target.value)}
        style={styles.search}
      />

      <div style={styles.productContainer}>
```

{filteredProducts.map((product) => (  
  <div key={product.id} style={styles.card}>  
    <img  
      src={product.image}  
      alt={product.title}  
      style={styles.image}  
    />  
  
    <h3>{product.title}</h3>  
  
    <p>Price: ${product.price}</p>  
  </div>  
  )}  
</div>  
</div>  
);  
}
```

```
const styles = {  
  container: {  
    textAlign: "center",  
    padding: "20px",  
    fontFamily: "Arial",  
  },  
}
